48	based science station this ant-monkey had become an unlikely but true friend.
49	His disappearance into the woods after Uriella explained to him about the full impact of the Lilith incident proofed to her how deep their friendship truly went.
...	
51	Uriella's relationship with Inoatar instantly became a course for serious worries.
52	Worries about her own survival but most of all worries about her family and clan.
53	Ant-monkeys had been bred on Scayune by the bio-guild for the cheap labor they could provide.

26	The next day passed without incident or headway on either project. The alien engineers were able to fabricate a makeshift interface module to the chip, and to produce a detailed map of the circuitry it contained. When they projected the circuitry on the cavern wall, it covered the wall with grey ant-trails: they needed to magnify a single small region hundreds of times to be able to examine it and leave notes on each subcircuit. It was laborous going, but El's people had patience to match their longevity. The engineering team worked late into the night.
...	
44	Only one of the anti-aircraft batteries got a shot off in time. A rocket spiralled lazily into the atmosphere, striking one of the incoming fireballs. A brilliant flash filled the sky, and billows of smoke blossomed from the impact point. An uneven rain of flaming debree tore its way from the explosion.
